Discussion was held regarding the request to waive additional utility connection fees for Wayne Street Commons located at 1030 S Wayne St. City Engineer Cope explained that when the project was originally the plan was for four one-inch water lines going into the two buildings. During construction builders ran into some constructability issues due to groundwater in the area and are proposing to change to one two-inch water line. The original connection fees paid for the one-inch lines were \$8,580.00 and the fee if they had originally planned one two-inch line would have been \$17,160.00. The property owner and builder are asking to waive the additional utility connection fees which are the difference between what was originally permitted and paid and the fees that would have been charged for the two-inch line.
